COMPANY PROFILE

MORE THAN 25 YEARS EXPERIENCE

The international "Technocom Group" is the one of the leading and dynamically developing manufacturers of the color concentrates and modifying additives for plastics in Eastern and Central Europe. All members of the "Technocom Group" use the same quality standards and know-how, have centralized decision-making and financial resources, and offer standardized product portfolio. Quality, flexibility and fast service are our competitive advantages.

Group members are:

- Technocom Compounds d.o.o., Slovenia – production and trading house selling in Balkans, South and Western Europe;

- Technocom LLC, Ukraine -production and trading house selling in the countries of Eastern Europe and Asia;
- Technoplast LLC, Ukraine - trading house, sales in Ukraine;

We offer:

- color, white and black masterbatches, modifying additives for the production of plastic products in the segments of packaging, agriculture, construction and others;
- single pigments concentrates (SPC) for masterbatches producers;
- mineral filled compounds (calcium carbonate, talc and others), based on PE, PP, PS and others;
- variety of tailor-made/bespoke masterbatches and additives for most demanding clients.

Production sites are located in Sentjur (Slovenia) and Kyiv area (Ukraine).

HISTORY

2021-2023

Opening new warehouse and production site for additive and color masterbatches in Slovenia

2014-2017

New production facilities for the production of modifying additives and black masterbatches.

Start of export to Western and Central Europe.

2006-2011

New production facilities based on twin-screw extruders for white, color masterbatches, calcium carbonate masterbatches and mineral-filled compounds.

1994-2003

Technocom LLC established as a manufacturer of screws, cylinders and forming tools for extrusion equipment. Improvement of comounding equipment in Ukraine and Europe

2018-2020

Opening of Technocom Compounds commercial office in the EU (in Slovenia).

Cooperation program with the EBRD.

Distributor for 9 EU countries for 10 years.

Global registration of the Technocom® Trademark

2012-2013

ISO 9001 quality certification

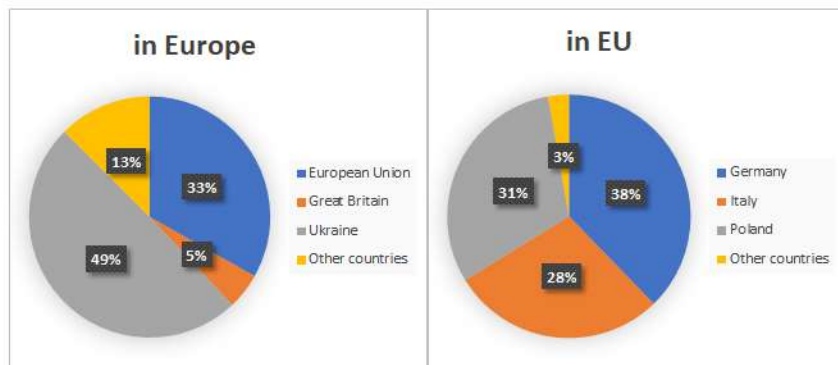

Start of export to Eastern Europe, CIS, Asia.

2004-2005

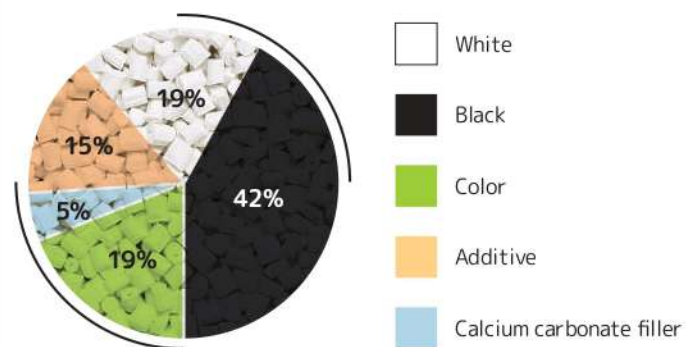

Technocom LLC transformed into a family company specializing in the production of masterbatches for plastics, opening its own production in the Kyiv region, founding the Technoplast trading house.

MISSION

WE BELIEVE THAT SMALL THINGS MADE WITH PASSION AND PRECISION CAN CHANGE THE WORLD. WE HELP PLASTICS PROCESSORS MAKE THE LIVES OF THE PEOPLE WHO USE THEIR PRODUCTS BRIGHTER AND MORE COLORFUL.

CONSUMER SERVICES

Sustainability

Flexibility

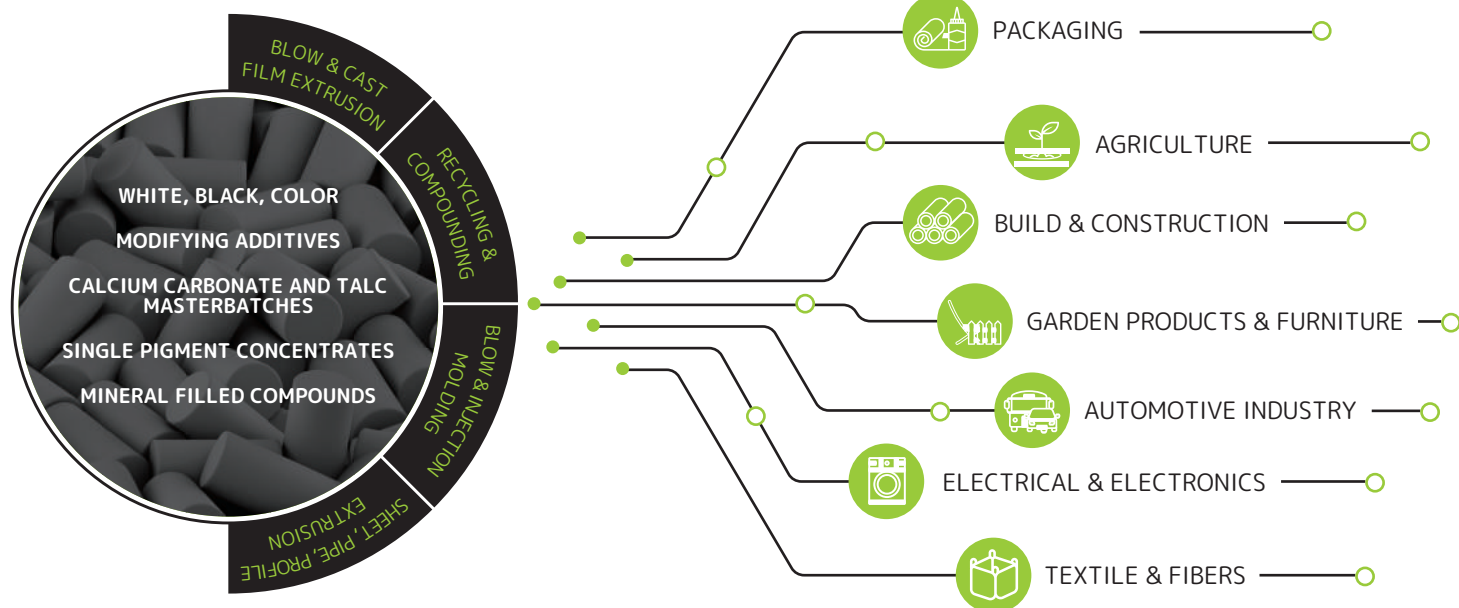

The philosophy of Technocom Group is to combine high-quality products with efficient and comfortable service for customers, whom we consider to be long-term partners. A partnership starts with pre-sales support and certainly extends to after-sales ongoing service.

Clients are offered:

- Product development according to technical requirements for coloring and other functional needs;
- Assistance in selection of our standard color masterbatch based on a sample of a concentrate or plastic product;
- Technology support in the implementation of our products;
- Manufacturing of the «all in one» type of products - a combination of color masterbatch and modifying additives;
- Opportunity to use the services of our R&D Laboratory.

WHAT WE DO

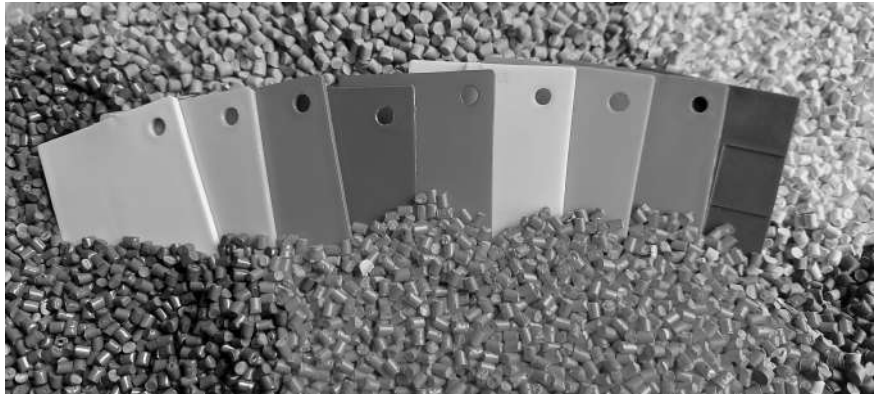

Technocom® Trademarked products for your **valuable applications**

High performance compounds and engineering plastics from Technocom Group

Technocom Group high performance compounds always are developed as bespoke formulations providing to our Clients:

- improved and/or "spot-on" spec's properties,
- lower operations costs (due to opportunity of running more simple processing equipment, avoiding ingredients premixing and dosing operations),
- improved product look.

Do you have in mind a preliminary compound formula for your particular application? We can tune it further quicker and more efficiently. Our formula development expertise is based on almost 30 years of polymer science knowledge of our R&D and Technology teams.

COMPOUNDING SOLUTIONS' RANGE WE OFFER:

- polyolefins: LLDPE, LDPE, HDPE, PP, recycled ones
- styrene-based: CPS, HIPS, SAN, ABS
- EVA-based
- polyamides: 6, 6/6
- recycled materials for the circular economy
- biodegradable compounds
